Maretron Introduces Alerts Capability to its DSM250 Multi-purpose Display

PHOENIX, June 9, 2009 – Maretron, a leading developer and manufacturer of marine electronic networked instrumentation, introduces alerts capability in its DSM250 Multi-purpose NMEA 2000® Color Display.

The DSM250 displays NMEA 2000® data on 16 user defined favorite screens and has quickly become the industry standard device for viewing all forms of NMEA 2000® data including engines, navigation, tanks, safety, and security devices. With the introduction of this new firmware upgrade, the user may now define all types of alerts from engines to tank levels to navigation parameters.

Like all Maretron products, any current DSM250 owner can upgrade the equipment free of charge by flash updating it right on board over the vessel's NMEA 2000® network.

Alerts have become highly desired functionality on boats having the new NMEA industry open standard with multiple sensors and displays from varied product manufacturers all tied together on one single backbone cable. Maretron are committed to providing equipment that takes full advantage of this new real-time bus concept. The DSM250 alarms are an example of fulfilling on this commitment.

Please visit Maretron at the following 2009 boat shows:

- Trawler Fest, June 26-28, Greenport, NY
- NMEA 2009 Convention, September 30 - October 2, Fort Myers, FL
- IBEX, Oct. 12-14, Miami Beach, FL
- Fort Lauderdale International Boat Show, Oct. 29 - Nov.2, Miami, FL

About Maretron

Maretron designs, manufactures and markets leading-edge networked electronics for the marine marketplace. Maretron's products are designed to the open industry NMEA 2000® standard, which allows electronic equipment from diverse manufacturers to be networked together for sharing information throughout the vessel. Maretron's corporate philosophy is to provide premium quality, state-of-the-art marine electronics that work together with traditional navigation techniques for the highest level of safety and performance while boating.
