Maretron Releases New Version of its Vessel Monitoring Software (N2KView®)

PHOENIX, March 23, 2009 – Maretron announces a new release (Version 2.5) of its vessel monitoring software (N2KView®), which includes support for video cameras and user defined backgrounds amongst many other new features. Video support comes in the form of analog cameras via Internet Protocol (IP) encoders, IP cameras, and USB cameras. Within N2KView®, video can be displayed in a variety of ways including one large video screen, multiple camera images on a single screen, or together with other vessel monitored information. N2KView® currently supports any analog camera through Axis Communications' IP encoders as well as Axis's IP cameras (other IP camera support will be announced in the future). The new release of N2KView® also adds user defined backgrounds where vessel monitored data can be directly overlaid on a ship's outline giving the captain and crew vital information about the location of potential trouble spots like bilge water levels, smoke alarms, carbon monoxide alarms, lights, and more.

"Maretron's N2KView® software is rapidly maturing into the industry's premier vessel monitoring software", says Larry Anderson VP of Sales and Marketing. "The addition of new features like video and user defined backgrounds together with existing features like comprehensive alarms and complete monitoring capabilities provides an extremely cost effective and all-inclusive vessel monitoring system."

Maretron has also updated its dedicated display product (DSM250) together with all of its sensor products to allow for user defined labels. This allows the information displayed within N2KView® software or shown on dedicated DSM250 displays to have meaningful titles. For example, the user can now configure the Maretron ultrasonic tank level monitor to report that it is the Aft Fuel Tank so the user can better identify and associate with sensors throughout the vessel.

Many other new features are included in this release of N2KView® like the ability to save and share favorite screens, which gives Maretron dealers the ability to collect favorite screens as they are developed for a specific vessel and reuse them at a later date saving both time and money. As in previous N2KView® releases, existing users can upgrade to the latest version by simply downloading the new version of N2KView® from Maretron's web page at no charge.

Please visit Maretron at the following 2009 boat shows:

- *Trawler Fest, May 7 - 9, Anacortes, WA*
- *NMEA 2009 Convention, Sept. 30 - Oct. 3, Fort Myers, FL*
- *IBEX, Oct. 12 - 14, Miami Beach, FL*
- *Fort Lauderdale International Boat Show, Oct. 29 - Nov.2, Miami, FL*
