## Maretron 2009 Product Line Catalog Just Released

**PHOENIX**, October 14, 2008 – Maretron announces the release of its latest full-line catalog which reveals details on new products currently being debuted at the 2008 Fall Boat Shows. This inclusive catalog provides detailed information and specifications for Maretron's expanded and revised product line for the 2009 marketing year. This is not only a typical product informational catalog, but it has a detailed "how-to-do-it" section for designing and installing NMEA 2000® networks. NMEA 2000® is the only "Industry-open" standard available for all manufacturers' devices to data-share between each other. Varied data from electronic navigational devices to engines and even beyond can be brought together on one screen for optimum ease of analysis and command. Maretron's NMEA 2000® approved cable and connector products are also described with detail in this new catalog.

Maretron's company philosophy hasn't changed since its inception in 2003; provide state-of-the-art products for the NMEA 2000® open industry standard for marine electronics. Many marine electronics companies have introduced new generation products for their own proprietary network standards but Maretron stands alone as a company that designs products to exclusively work only on the NMEA 2000® open standard.

To obtain a copy of this newly released "complete-line" catalog please visit: [www.maretron.com](http://www.maretron.com) and download a copy.

About Maretron

Maretron designs, manufactures and markets leading-edge networked electronics for the marine marketplace. Maretron's products are designed to the open industry NMEA 2000® standard, which allows electronic equipment from diverse manufacturers to be networked together for sharing information throughout the vessel. Maretron's corporate philosophy is to provide premium quality, state-of-the-art marine electronics that work together with traditional navigation techniques for the highest level of safety and performance while boating. For detailed product information visit [www.maretron.com](http://www.maretron.com).
