

## Maretron Introduces NMEA 2000® 3.5" Multi-Function Color Display (DSM150)

PHOENIX, December 11<sup>th</sup>, 2012 – Today Maretron announced the release of its multi-function 3.5" color display, which is capable of displaying NMEA 2000® navigational and vessel monitoring information including boat speed, heading, depth, wind, engine, generator, fuel flow, tank, battery, temperature and much, much more. The new DSM150 consumes a minimal amount of power, is completely waterproof, sunlight readable, and has 16 user configurable favorite screens.

Kip Wasilewski, Maretron's Director of Sales for the Americas, said, "Maretron introduced an NMEA 2000® multi-functional 5.7" color display in 2007 that proved to be very successful, and now with the introduction of the DSM150, all the same functionality is available in a smaller, more cost-effective package." Kip went on to say, "Although Maretron is known for large comprehensive vessel monitoring and control systems, Maretron also has a substantial business selling smaller systems. As an example, some users are only interested in monitoring their tanks, batteries, or fuel flow and with the introduction of the DSM150, Maretron can offer very competitive small systems."

Some examples of the many types of user configurable screens:

The DSM150 is immediately available for shipping to Maretron's trade customers. To see these and other Maretron products, please visit Maretron or Maretron's distributor at the following 2013 boat shows:
