

Maretron®

Vessel Monitoring & Control

PRODUCT ANNOUNCEMENT

Maretron N2KMeter NMEA 2000 Diagnostic Tool to be Retired

Please be advised that the Maretron N2KMeter® will be retired as a result of current components being unavailable. A new version of the product is in the works.

In the meantime, our distributors have a supply of N2KMeters available for purchase.

Stay tuned for the release of the new Maretron N2KMeter!

The N2KMeter® enables trained and untrained personnel to diagnose and troubleshoot network installations quickly and easily. Completely passive on the network, the meter analyzes both data and power lines on the network. In seconds, both network-wide and device-specific traffic as well as power monitoring information is captured and displayed on a simple user interface.

- Diagnostic tool for NMEA 2000® networks
- Evaluates physical layer device functions on a network
- Onboard data can be locked in & evaluated later by service technicians

PART NUMBER - N2KMeter-01 Diagnostic
Meter w/1m Micro Cordset
