

## Maretron Introduces Two Submersible Pressure Transducers for Measuring Tank Fluid Levels

PHOENIX, February 12<sup>th</sup>, 2016 - Today Maretron announces the release of two submersible pressure transducers for measuring tank fluid levels. One of the submersible pressure transducers (PTS-0-1.5PSI-01) is used for tanks up to 40 inches or 1 meter in depth while the second transducer (PTS-0-3.0PSI-01) is used for tanks up to 80 inches or 2 meters in depth. The submersible pressure transducers are used together with Maretron's Fluid Pressure Monitor (FPM100), which allows tank fluid level to be broadcast over an NMEA 2000® network where it can be monitored from any compatible NMEA 2000® display. When used together with Maretron displays, alerts can be set so the user can be informed of low or high tank levels. And when not on-board the vessel, users can be notified through emails or text messages about their tank levels. Additionally, the tank levels can be stored using Maretron's data recorder (VDR100) for later analysis.

Kip Wasilewski, Maretron's Director of Sales, said, "Maretron offers non-submersible pressure transducers that are mounted from the outside and into the bottom of a tank for measuring tank levels." Kip went on to say, "Unfortunately, access to the bottom of a tank from the outside is not always possible and this is where a submersible pressure transducer is used. The submersible pressure transducer is lowered to the bottom of the tank using a tank top access hole and supplied cover plate with a watertight gland. And when used together with Maretron's FPM100, the system can be calibrated for any shape tank for extremely accurate tank level indication." To learn more about Maretron's submersible pressure transducers, please visit this web page (<http://maretron.com/products/fpm100.php/?tab=4>).

**Submersible Pressure Transducer**

The new submersible pressure transducers are immediately available for shipping to Maretron's trade customers. To see these and other Maretron products, please visit Maretron or Maretron's distributor at the following 2016 boat shows:

- *Miami International Boat Show – February 11-15, 2016 – Miami, FL (Maretron – Booth C373)*
- *Eurasia Boat Show – February 13 – 21, 2016 – Istanbul, Turkey (Denpar – Stand – To Be Determined)*
- *Dubai International Boat Show – March 1 – 5 – Dubai, UAE (Elcome – Hall-ESS Stand E-70)*
- *Stockholm International Boat Show – March 4 – 13, 2016 – Stockholm, Sweden (Marinplus – Stand C13:19)*

### **About Maretron**

Maretron, a world leader in vessel monitoring and control systems, designs, manufactures, and markets leading edge products for commercial and recreational marine markets. Our products are highly integrated to provide a common user interface to the equipment and systems commonly found onboard a vessel. Maretron's corporate philosophy is to provide premium quality, state-of-the-art vessel monitoring and control products that work in conjunction with traditional navigation techniques for the highest level of safety and performance while on the water.
