Release to Manufacturing: N2KExtractor™ Version 3.1.4

Maretron announces the release of version 3.1.4 of the N2KExtractor™ NMEA 2000 Data Extractor Software. The program is available from (<http://www.maretron.com/downloads>) under the “Software Updates” category.

The full build number of the version is 3.1.4.20170220.

Users with internet access will be prompted to update to this version when they next start N2KExtractor.

Changes in N2KExtractor™ version 3.1.4 from version 3.1.3:

- New Features
 - Change the Parameter Table search function to a filter (4089)
 - Prevented creation of Recording Periods where there is no data received (4105)
 - Changed the orientation of the boat symbol on the map to the vessel's Heading, if available (4110)
 - Made it easier to move the Time Bar handles (4111)

- Corrections
 - Corrected program crash trying to synchronize recording periods (2840)
 - Corrected program hang when extracting with short interval (3778)
 - Corrected display of VDR Memory Capacity and Memory Used Parameters (4103)
 - Corrected display of Active Station Percent Command value. (It was being multiplied by 100.) (4104)
 - Corrected saving of data to .csv file when Extraction Interval is 0 (4106)
 - Corrected entry of null Position Field in .csv file. (It was missing a column.) (4107)
 - Allow colons to be typed into the Extraction Interval when creating .csv files (4108)
 - Corrected display of Transmission Status values (4109)
