

What is a Load Equivalence Number (LEN)?

Article Number: 464 | Rating: Unrated | Last Updated: Sat, Jun 7, 2014 5:39 AM

A Load Equivalence Number or LEN is a whole number used to express the amount of current that is drawn from an NMEA 2000 network. One LEN is equal to 50mA. If a device draws 151mA of current from the network, then its LEN is 4. Note that the LEN is always rounded up to the next whole number.
