

How do I make a custom NMEA 2000 cordset cable? Does Maretron offer a field attachable connector?

Article Number: 558 | Rating: Unrated | Last Updated: Wed, May 24, 2017 5:14 PM

Maretron offers several accessories that allow you to make a custom NMEA 2000 cable.

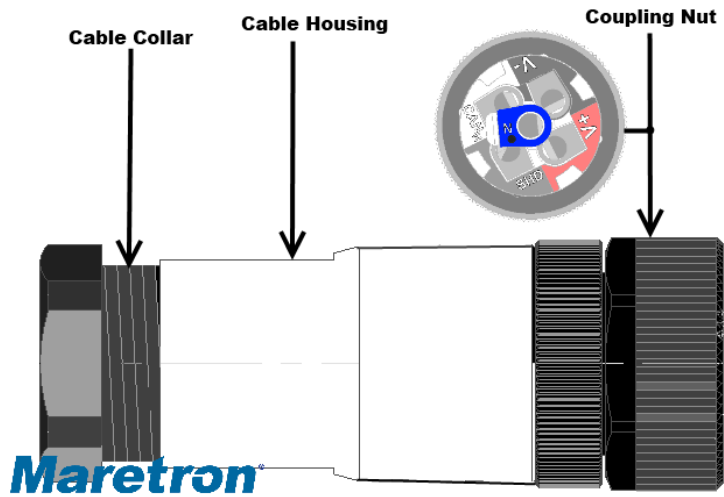

It may be necessary to make a custom cable for the following reasons:

- Cable runs longer than 10m in length
- Routing raw cables micro/mid through bulkheads, wire trays, and conduits.
- Custom length run that are not clearly defined in the NMEA2000 network design and the installation calls for a make as you go process.
- Making or modifying proprietary cable connections to engines, non-standard NMEA2000 compatible equipment.

Part numbers and descriptions of Maretron's Micro/Mid field attachable connectors:

- FA-CM-ST: Micro/Mid Field Attachable Connector (Straight Male)
- FA-CM-90: Micro/Mid Field Attachable Connector (90° Male)
- FA-CF-ST: Micro/Mid Field Attachable Connector (Straight Female)
- FA-CF-90: Micro/Mid Field Attachable Connector (90° Female)

Part numbers and descriptions of Maretron's Mini field attachable connectors:

- FA-NM-ST: Mini Field Attachable Connector (Male)
- FA-NF-ST: Mini Field Attachable Connector (Female)
