

Can Maretron devices be displayed on a Raymarine Seatalk NG network?

Article Number: 613 | Rating: 5/5 from 1 votes | Last Updated: Wed, Aug 1, 2018 7:08 PM

Yes, many of Maretron device's data can be displayed on Raymarine Chart-plotters With Seatalk and Seatalk ng functionality. Firstly, Maretron recommends that customers verify device compatibility by reviewing the [Maretron product's datasheet](#) specifically the transmit PGN section of the datasheet (page 2). Second, review the Chart plotters datasheet for Received PGN list for display to confirm the compatibility.

Please note: Several Maretron devices allow for multi message distinction for example: PGN 130314(Temperature) allows for source selection with instance number selection, a configuration that can only be adjusted using a Maretron interface. The device configuration can be performed using a Maretron [DSM150/250/410](#) or our [N2KAnalyzer software](#) tool only.

Raymarine offers a Seatalk NG to Devicenet converter cable which helps connect a Maretron device to a Seatalk NG network.

Contact Raymarine for more information about part number A06045.
