

Can Maretron's sensor data be displayed on a Garmin network?

Article Number: 673 | Rating: 5/5 from 1 votes | Last Updated: Tue, Aug 22, 2017 6:11 PM

Yes, much of Maretron device's data can be shown on Garmin displays with "NMEA 2000" functionality. Firstly, Maretron recommends that customers verify device compatibility by reviewing the [Maretron product's datasheet](#) specifically, the transmit PGN section of the datasheet (page 2). Second, review the Chart plotters datasheet for Received PGN list for display to confirm the compatibility.

Please note: Maretron devices allow for multi message distinction to be interpreted correctly on a display for example: PGN 130314(Temperature) allows for source selection with an instance number selection. A configuration that can only be adjusted using a Maretron device interface. The device configuration can be performed using a Maretron [DSM150/250/410](#) or our [N2KAnalyzer software](#) tool only.
