

I have an Onan generator with a power rating between 40-99kW; what Maretron adapter cable should I order to connect the generator to the J2K100?

You should order the Maretron adapter cable MCF-2M-D4 (J2K100 adapter Micro female to Deutsch 4 Pin 2 Meter Cordset) when connecting an Onan generator with a power rating of 40-99kW to the J2K100.
