

How do I reset the RAA100 to send the factory default messages (or PGNs)?

You reset the RAA100 to transmit the factory default messages using Maretron's DSM250 display in the following way. Enter menu mode, scroll to "Configuration..." and press enter. Scroll to "Device Configuration..." and press enter. Scroll to the row containing the RAA100 and press enter. Scroll to "Reset Factory Defaults" and press enter twice. Beware that resetting factory defaults resets all settings back to factory defaults, not just the transmitted messages.
