

I see that Maretron's DSM150, DSM200, and DSM250 displays have a WSO100 configuration setting called "Reset Factory Defaults"; what is this?

Maretron's DSM150, DSM200, and DSM250 displays have a WSO100 configuration setting called "Reset Factory Defaults", which is used to return the WSO100 to its factory settings. Resetting the WSO100 clears the installation offset, resets the wind damping period, clears rate barometer, humidity and temperature settings, and returns PGN enable/disable back to the factory default settings.
