

What firmware changes have taken place on the Maretron DCR100?

What firmware changes have taken place on the Maretron DCR100 Relay Module?

You can update your device using the [N2KAnalyzer](#) software tool.

DCR100 Firmware Versions

1.1.2.3 (2013-07-19)

- Removed support for the deprecated 127502 Switch Bank Control parameter group (2458)
- Added support for hardware timers and counters for each channel (2543)
- Fix conflict between XALM and XPD command (2547)
- Updated the supported NMEA 2000 database version to 2.000 (2612)
- Corrected SN erasing when upgrading from older firmware issue (2651)

1.0.3.1 (2011-10-25)

- Adds ability to lock switches from N2KView or DSM250, preventing them from being turned on or off until unlocked.
- Adds ability to power up with switches set to a particular state: on, off, or the last state the switch was in before power was lost. This power up

state is overridden by the lock setting described above.

1.0.1 (2011-04-22)

- Initial public release
