

I see the TLM100 and TLM150 have an SAE 5-hole mounting pattern; where can I find a template?

The TLM100 hole pattern for mounting the sensor to a fluid tank is a common SAE J1810 5-Hole Pattern.

Use the attached article file: "5 Hole FT mount Maretron.pdf" as a reference.

Note: Print PDF at 115% scale for a usable TLM100 and TLM150 pattern.
