# What information is available from the fluid pressure monitor (FPM100) and can be viewed on Maretron's displays?

The FPM100 is capable of transmitting the following information:

- Pressures:
    - Atmospheric Pressure
    - Water Pressure
    - Steam Pressure
    - Compressed Air Pressure
    - Hydraulic Pressure
    - User Defined 129 to 144
- Tank Types:
    - Fuel Level, Capacity
    - Fresh Water Level, Capacity
    - Waste Water Level, Capacity
    - Live Well Level, Capacity
    - Oil Level, Capacity
    - Black Water (Sewage) Level, Capacity
    - Reserved 1-7 Level, Capacity
