What is GWUtilities used for?

GWUtilities is a program that allows a user to configure the NMEA 2000 / NMEA 0183 translations performed by the Maretron USB100 NMEA 2000 / USB gateway. Normally, the translations programmed into the gateway at the factory should be satisfactory, but a particular application may require that some of the normally enabled translations be disabled. In addition, gateway products contain additional translations that are not enabled at the factory and may need to be enabled for use with particular software.

Please refer to the USB100 user's manual for details.
