

Duel/Split Screen Engine Display template for TSMxxx/MBBxxx

Below are sample images of the attached .nvs screen files.

Port Engine 1 & Stbd Engine 1 .nvs files

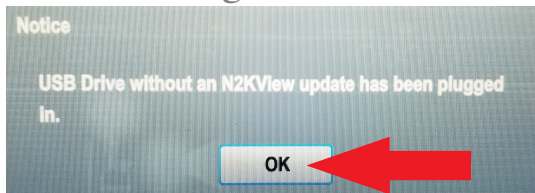

Port Engine 2 & Stbd Engine 2 .nvs

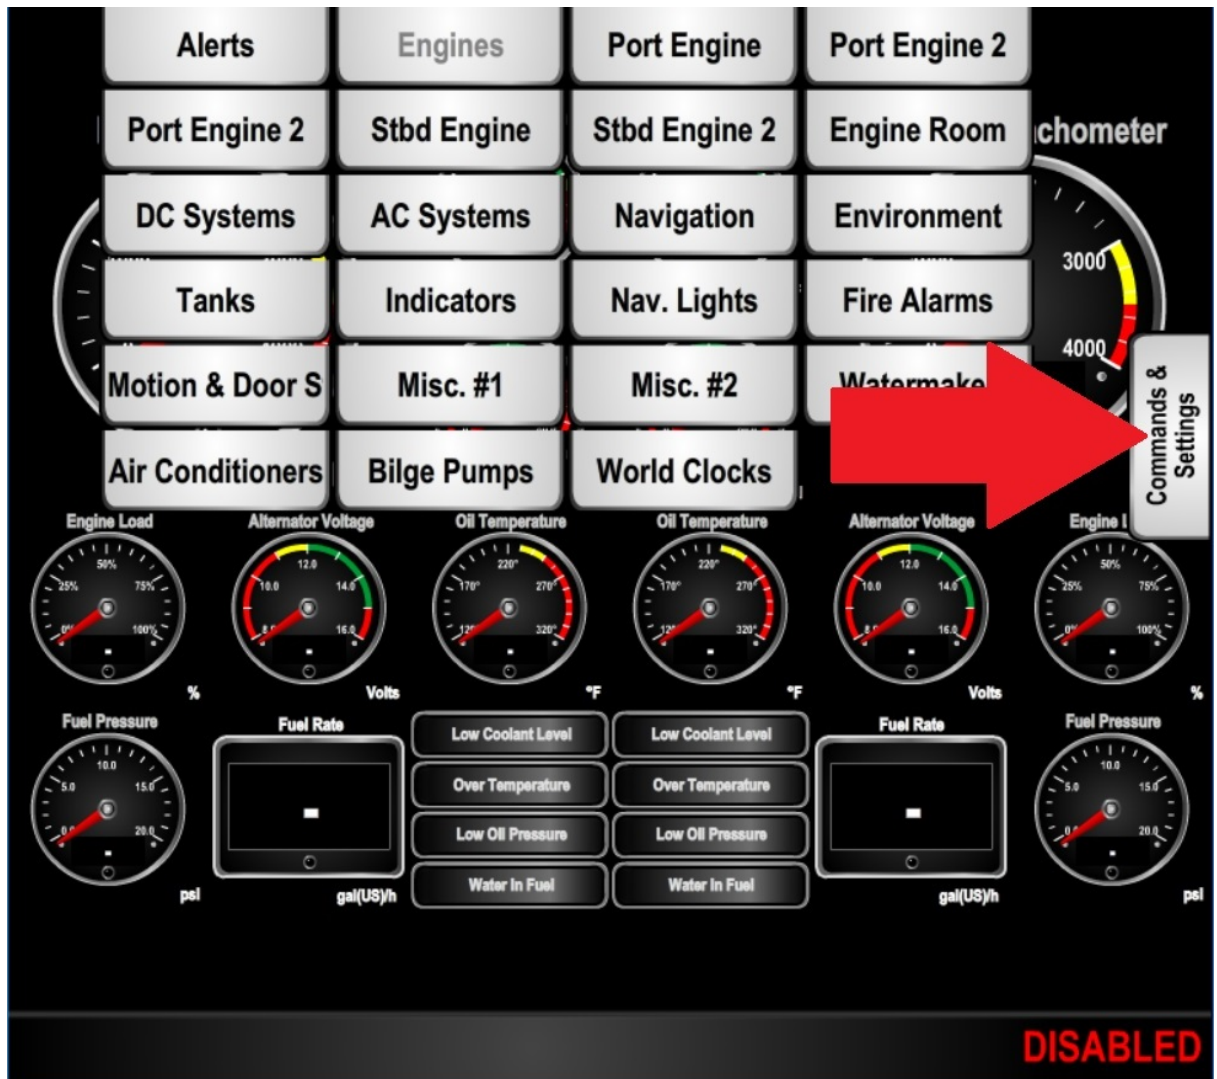

How to load screens onto TSMxxx/MBBxxx or PC running N2KView.

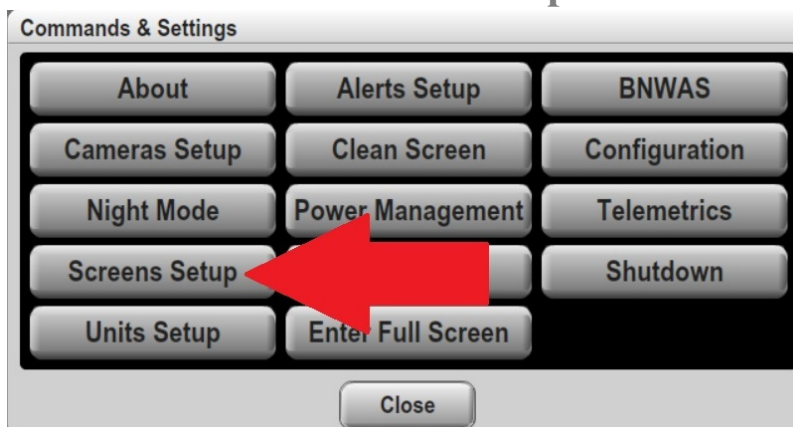

1. Copy the .nvs (Screen File) onto a USB flash drive from your computer.
2. Insert USB flash drive into the Maretron device. You will be prompted with a message that a drive has been detected. Select OK.

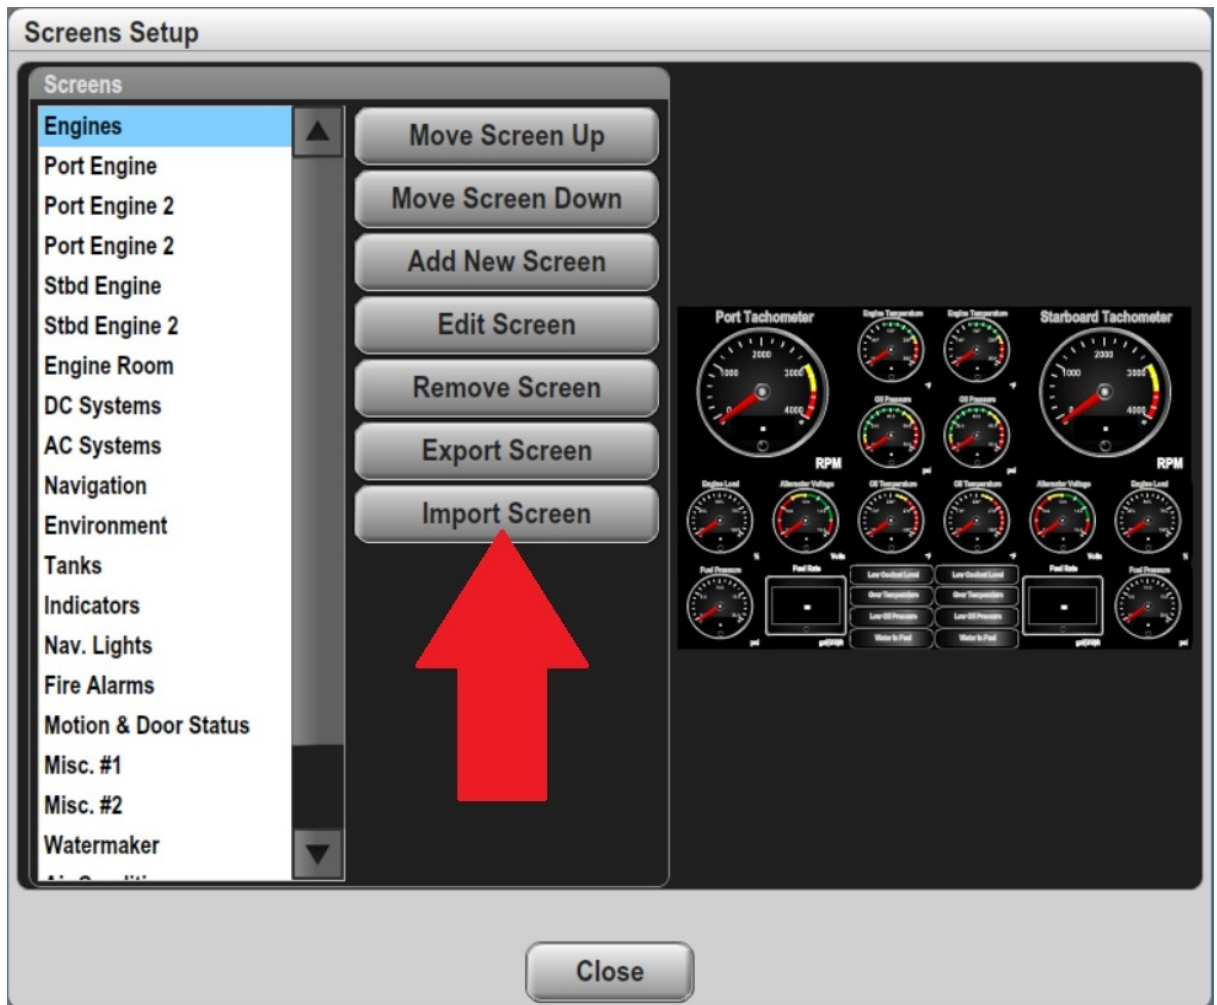

3. Tap on the display, select tab labeled **Commands & Settings**

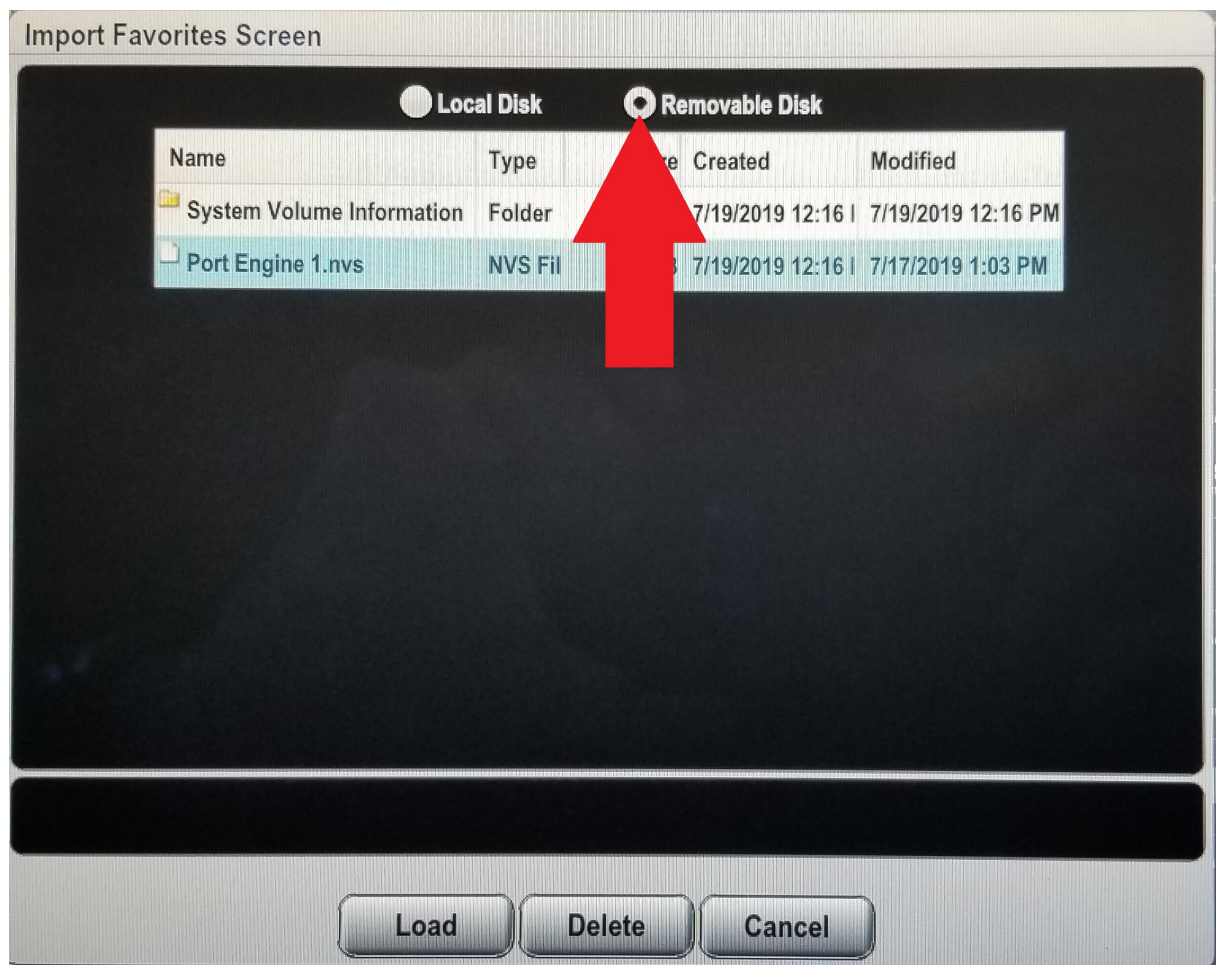

4. Select tab labeled **Screens Setup**

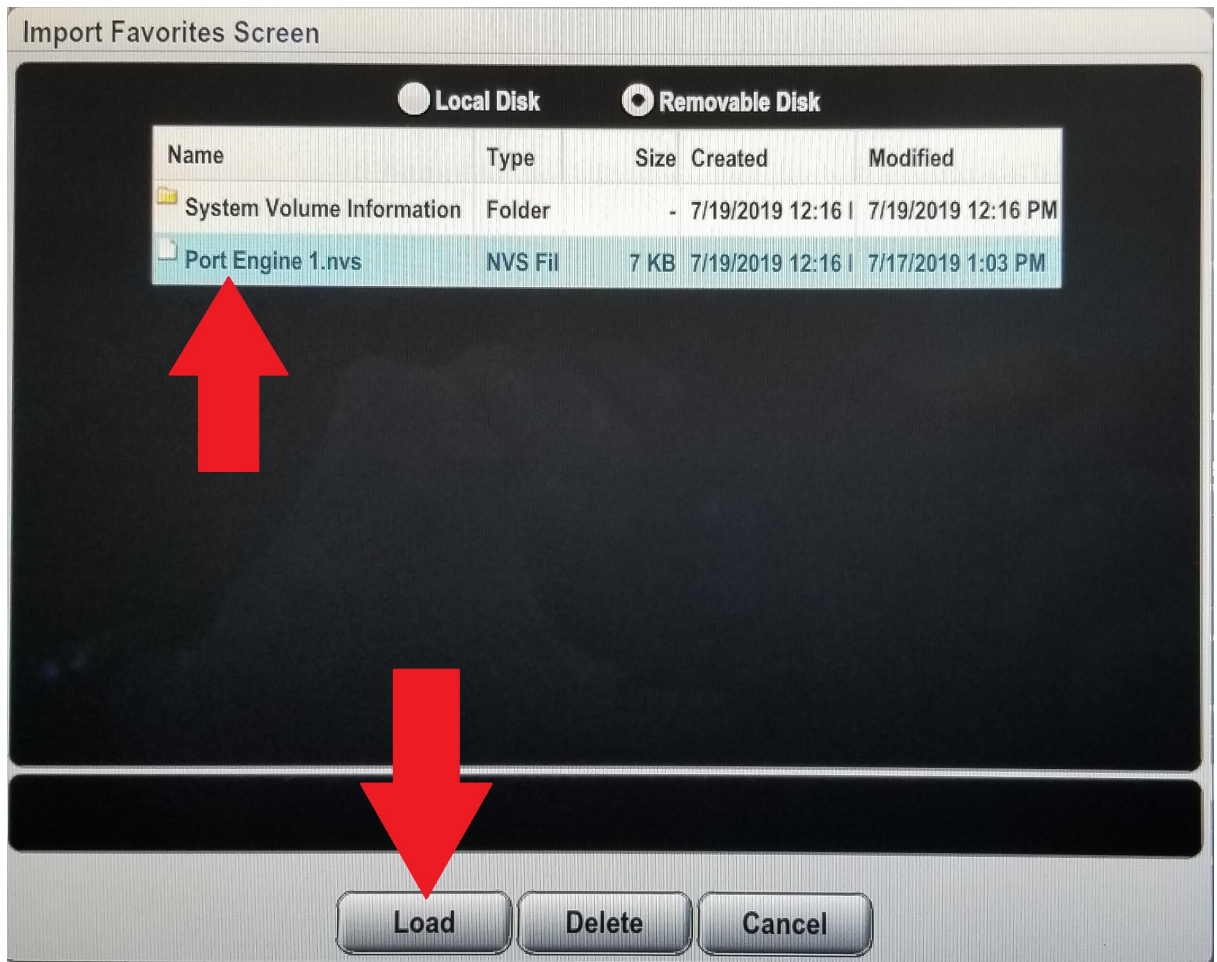

5. Select tab option labeled **Import Screen**

6. Select radial button labeled **Removable Disk**

7. Select the desired file you want to import, and select tab labeled **Load**

8. Continue this process until all screens have been imported.

9. Select tab labeled **Save** to exit screen setup console
