

# How do I reset the TLA100 to send the factory default messages (or PGNs)?

You reset the TLA100 to transmit the factory default messages using Maretron's DSM250 display in the following way:

1. Enter menu mode, scroll to "Configuration:" and press
2. Scroll to "Device Configuration:" and press
3. Scroll to the row containing the TLA100 and press
4. Scroll to "Reset Factory Defaults" and press twice.

Beware that resetting factory defaults resets all settings back to factory defaults, not just the transmitted messages.
